EMPLOYMENT

React-Native Engineer   **Esharti**   **Fall 2023**

Sign Language App

- Developed visually appealing and responsive frontend features for a sign language education app on iOS and Android using React Native.
- Expanded app functionalities, introducing sign language courses, dictionaries, and online events.
- Implemented a certification system, enabling users to receive certificates upon completing sign language courses.
- Collaborated with cross-functional teams, including designers and backend developers, fostering an innovative development environment.

Full-Stack Engineer   **Road Logistics**   **Summer 2023**

"Website (Dashboard) "

- Led the end-to-end development of a web dashboard enabling seamless SMS communication with shipping company customers.
- Implemented a feature-rich system allowing employees to send automated SMS messages containing tracking links and shipment AWB details to customers.
- Developed functionality for managers and admins to track sent SMS messages, providing insights into communication with users.
- Utilized Node.js and Express.js for the backend, MongoDB as the database, and Next.js with Tailwind CSS for a responsive and visually appealing frontend.

Back-End Developer   **Crave-Corners**   **Spring 2022 – Spring 2023**

"Multi-functional Food Delivery Platform: Laravel 9, MySQL, Web, and Mobile App Development"

- Engineered the backend architecture for Crave Corners, overseeing three websites and a mobile app, ensuring robust and scalable performance.
- Developed a partner dashboard for restaurants, enabling them to showcase products, receive orders, manage inventory, and handle invoices and payments seamlessly.
- Enhanced customer experience by enabling easy ordering, order tracking, and restaurant rating functionalities through the website and mobile app.
- Designed and implemented an admin dashboard for maintainers, facilitating restaurant applications, order tracking, ad management, and communication with restaurant owners.
- By leveraging Laravel 9 and MySQL, I contributed to the successful development and maintenance of the Crave Corners platform, empowering restaurants and customers with a feature-rich and efficient system.

Full-stack Developer, Intern   **Oxygen Technology**   **Summer 2023**

E-commerce Website.

- Spearheaded the development of a modern e-commerce website using Next.js and Tailwind CSS for the frontend, ensuring a seamless and visually appealing user experience.
- Implemented TypeScript to enhance the robustness of the frontend, providing a statically typed environment for a more reliable codebase.
- Developed the backend using Node.js and Express.js, creating a robust and efficient server-side architecture to support the e-commerce website.

EDUCATION

Karabuk, TR   **University of Karabuk**   **Fall 2020 – June 2024**

- B.Eng. in Computer Engineering, June 2024. GPA: 3

- Graduate Coursework: Software Foundations; Computer Architecture; Algorithms; Artificial Intelligence; Comparison of Learning Algorithms; Computational Theory.
- Undergraduate Coursework: Operating Systems; Databases; Algorithms; Programming Languages; Comp. Architecture; Engineering Entrepreneurship; Calculus II.

Languages and Technologies

- Javascript; TypeScript; Java; Php; Nodejs; Expressjs; Nextjs; Reactjs; React-Native; Html5; Css; Tailwindcss; MySql; MongoDB; Oop;
